

Efficiently and seamlessly conduct enterprise-wide search, targeted forensically sound collection, systemized preservation, litigation hold, processing, data assessment and complete legal review—all while keeping costs in line and reducing risk.

Traditionally, no matter which tools an organization uses to address the EDRM, at a minimum the data must be identified, then collected, processed for analysis, internally reviewed and culled—and then that reduced data set must be processed again for import into a legal review tool for outside counsel.

### AD eDiscovery® and the EDRM

## What does addressing the entire e-discovery life cycle in a single platform mean for your organization?

- **Mitigate Corporate Risk.** Limit handoffs between vendors and technologies with a single, secure, end-to-end solution and protect against spoliation, data loss and theft.
- **Ensure Compliance.** Make sure data preservation needs are systematic and defensible in accordance with U.S. and international preservation requirements for litigation, and governmental regulatory requirements.
- **Improve Response Efficiency.** Rapidly access, capture and analyze information across a broad range of repositories and targets by leveraging mature and broadly adopted forensic-grade technology.
- **Lower Overall Cost.** Process all potentially relevant information, structured and unstructured, inside and outside the enterprise, with a single integrated solution.

AD eDiscovery® finds and collects needed data from the broadest range of structured and unstructured data sources of any single platform on the market. Using user-friendly, workflow-driven templates, AD eDiscovery performs “agentless” collections from:

- Box™
- CloudMail® (POP & IMAP)
- CMIS
- Documentum®
- DocuShare®
- Domino™ (Notes)
- Druva (AD Client)
- Enterprise Vault™
- Exchange EWS (2010 SP1, 2013, O365, SilverSky®)
- Exchange MAPI (2007, 2010, 2013)
- Google Drive™
- Gmail™ (Administrative)
- Microsoft® Office 365® (Exchange [email & calendar], SharePoint® and OneDrive®)
- OpenText™ ECM (LiveLink™)
- SharePoint (2007, 2010, 2013, O365)
- WebCrawler® (Web 1.0)

## Why AD eDiscovery?

A single, fully integrated platform for forensically sound enterprise-wide preservation/lit hold, search, collection, processing, data assessment and complete legal review, AD eDiscovery gives teams a repeatable, defensible process for managing e-discovery that will hold up in court. The 6.2 release brings many customer-requested features and technology-driven improvements:

- **Get a top-level, comprehensive view** into the status of key functions through a new widget-based e-discovery dashboard—with the option to drill in for additional detail.
  - **See information at a glance** of collection, processing, litigation holds and document review jobs, plus get a real-time view of active users within the system.
  - **Set up email notifications** for common activities, such as when processing and collection jobs complete.
- **Connect and collect** data from the most-used data repositories and cloud platforms, including Microsoft® Office 365®, Box and more, with the latest improvements to our more than 30 connectors.
- **Stop a lengthy ingestion process in its tracks**—then go back and make changes or resubmit it with the appropriate criteria. Easily roll back and take out evidence from any location.
- **Print faster and with better quality** using new PDF image printing capabilities for batch jobs.
- **Search by Bates number** in online review to quickly get your hands on specific documents.

Whether it's for investigation, litigation or compliance, AccessData® offers industry-leading solutions that put the power of forensics in your hands. For 30 years, AccessData has worked with more than 130,000 clients in law enforcement, government agencies, corporations and law firms around the world to understand and focus on their unique collection-to-analysis needs. The result? Products that empower faster results, better insights, and more connectivity. For more information, visit [www.accessdata.com](http://www.accessdata.com)
