Be confident in your data management— identify, assess and eliminate risk.

The stakes have never been higher for CIOs and InfoSec leaders, who face relentless threats to their data. Beyond a predicted increase in scrutiny due to regulatory changes, now 67 percent of CCOs and 82 percent of directors express concerns about personal liability. To protect your organization—and yourself—from risk, and to constrain your* data, you need to respond to potential threats to your data with speed and agility.

Introducing AD RTK™

Get ahead of the challenges to effectively and efficiently manage risk across the enterprise.

- **Take unprecedented control of your data**—easily find and remediate potential data compliance threats.

- **Gain visibility and deep insights across the enterprise**—access any device discreetly to search and destroy risks.

- **Reduce risk and automate remediation**—delete data, or make forensically sound copies of data for defensive evidence in an investigation, in a powerful solution with limited data movement.

* IDG Survey, December 2016.

50% of companies surveyed are conducting weekly investigations * *to find and stop high-risk employee behavior, such as acceptable use policy violations and corporate intellectual property theft.*

A Risk Remediation Solution

AD RTK™ empowers you to conduct investigations and execute enterprise-wide risk remediation with complete data visibility. This easy-to-use application features a simplified interface, making it possible for non-technical teams to quickly and proactively identify and remediate suspect data before launching a full-scale forensic investigation, if needed.

Protect Your Most Valuable Data

When you suspect that PII and other sensitive company or customer data is located where it shouldn't be, every moment counts. **AD RTK** enables you to save critical time in swiftly eliminating potential data leaks, ensuring your corporate data is protected across the enterprise.

Available at a lower price point than competing solutions that also focus on cyber endpoint security, **AD RTK** offers a more affordable way to manage data risk.

- **Identify and locate data** using the proven, advanced search capabilities in **AD RTK** to search by file type, key words, hash values, metadata and more.

- **Inventory the software applications** installed on your organization's computers.

- **Conduct discreet investigations and forensically copy or collect suspect data,** without detection or interruption to work.

- **Delete non-compliant data or eliminate unapproved processes** to help assess, control and remediate risk and enable policy enforcement across the enterprise.

- **Report and share findings** on responsive files or emails across IT, information security, legal, compliance and audit teams to ensure collaboration and keep critical business stakeholders up to speed.
