

## **AccessData Corporation and CT Summation Merger Closes**

AccessData Group Now The Largest and Fastest Growing eDiscovery Software Provider

**LINDON, UTAH—Monday, July 26, 2010** AccessData Corporation and CT Summation are excited to announce that they are now a single company, AccessData Group LLC. AccessData Group is focused on delivering the first *true* end-to-end eDiscovery software solution capable of addressing all phases of the discovery process, from litigation hold to trial.

AccessData Group has an unsurpassed technology portfolio. Its AccessData eDiscovery software enables organizations to address litigation hold, automated forensic collection, processing, analysis and production for final review. In the *2010 E-DISCOVERY AND E-DISCLOSURE USER SURVEY* conducted by The 451 Group, AccessData was cited more than any other eDiscovery vendor by respondents planning to purchase eDiscovery software or services in the next 12 months. In addition, its suite of legal review and case management software products are the gold standard throughout the legal community, having received more than 45 legal industry technology and "Reader's Choice" awards since 1997. These award-winning products—iBlaze, Enterprise, CaseVantage and the services offering, CaseVault—are now part of AccessData Group's "AD Summation" product line.

Over the next year, AccessData Group will integrate these complementary litigation support technologies to enable corporations and outside counsel to address the entire litigation lifecycle seamlessly, using a single solution. This integrated eDiscovery, legal review and case management product will bridge the gaps that currently exist between IT and corporate counsel, and corporate counsel and outside counsel.

"We at AccessData are out to revolutionize the eDiscovery industry by allowing organizations to rely on a single solution to enable real-time collaboration among litigation support personnel in IT, inside counsel and outside counsel. This solution will give corporations unsurpassed control over their legal matters, and serial litigants dealing with hundreds of cases a year will be able to save millions of dollars." said Tim Leehealey CEO of AccessData.

Once the eDiscovery and litigation support technologies are fully integrated, Legal and IT will be able to conduct an entire eDiscovery matter from litigation hold to trial, all with a single solution. This single solution model will eliminate the risk, hassle, and costs associated with moving between multiple tools, used by multiple parties and managed by various service providers.

### **About AccessData Group**

AccessData Group has pioneered computer forensics and litigation support for more than twenty years. Over that time, we have grown to provide a broad spectrum of stand-alone and enterprise-class solutions that enable digital investigations of any kind, including computer forensics, incident response, eDiscovery, legal review, IP theft, compliance auditing and cyber security. More than 100,000 customers in law enforcement, government agencies, corporations, consultancies, and law firms around the world rely on AccessData software solutions, as well as our premier hosted review and digital investigations services. Law firms and corporations use our market-leading AD eDiscovery solution to search for, collect, process, cull, analyze, and review electronic evidence for the purposes of litigation. In addition, our AD Summation line of legal review and case management products, including CaseVantage and the award-winning iBlaze, is the top choice among law firms. Relying on industry-leading technology from a single vendor, organizations are able to eliminate the hassle, risk and cost associated with juggling tools and inefficient processes. AccessData Group's purpose is to make it possible for an organization to address all its eDiscovery needs with one company.
