# *Readme for Registry Viewer*

## *1.5.5*

### **NEW AND IMPROVED**

- Registry Viewer now utilizes a counter for licenses using the AccessData Network License Service (NLS). This counter tracks of the number of licenses in use, and when the count reaches zero, no one else can login to the program until one or more authenticated users logout.
- Registry Viewer now supports Registry Summary Reports (RSR) generated through FTK 3 case processing.

## *1.5.2*

These release notes detail the enhancements and resolved issues for AccessData<sup>®</sup> (AD) Registry Viewer (RV) 1.5.2.

### **ENHANCEMENTS**

The following items have been added to this release of RV:

- RV 1.5.2 integrates with Forensic Toolkit (FTK) 1.8 to allow FTK to generate Registry Summary Reports (RSRs) during case pre-processing.

### **RESOLVED ISSUES**

The following issues with RV 1.5.1 have been resolved with the release of RV 1.5.2:

- RV 1.5.2 corrects a problem in which attempting to preview a large summary report would sometimes bring up a blank Internet Explorer\* window.
- RSR template files are now included in the Registry Viewer installer eliminating the need to download them from the AD Web site.
- AD License Manager and AD Language Selector no longer automatically install with RV.
- RV no longer crashes when viewing certain corrupt registry files.
