

Harness the  
full power,  
speed and  
reliability of  
AccessData® ...  
in the cloud!

*Get instant, affordable scalability in a secure environment*

**COLLABORATIVE  
ENVIRONMENT**

**SCALABLE  
PROCESSING**

**DISASTER  
RECOVERY**

**SEAMLESS EXPORT  
INTO RELATIVITY®**

Looking to reduce the burden of IT infrastructure while improving speed? AccessData products are cloud-ready, giving corporations, law firms, law enforcement and government users superior agility, security and scalability. Upload, process, review and produce with 24 x 7 access to data in an environment that's easier and less costly to manage.

***AD Cloud Solutions  
can outperform  
your current  
environment.***

**Run any AccessData product in any cloud environment, with the exact support you need.**

Set up AD Cloud Solutions in your own cloud environment or have us host and manage your AccessData applications for you, including OS, hardware and software updates, backups and database maintenance.

**Increase the efficiency of technologists and investigators.**

Eliminate or reduce tasks around IT procurement, maintenance and capacity planning for AccessData apps, while improving system performance, for better user access and productivity. Focus on being expert at investigations, not at maintaining systems and software.

**Expand your organization's investigative capabilities, for less.**

Scale up or down as needed—without the costs associated with purchasing more hardware and housing massive IT infrastructure.

### TRUSTED SECURITY

*Mitigate risk by keeping data secure, confidential and accessible in the cloud—we support AWS™, Microsoft® Azure®, Google Cloud™ and more.*

### EXPERT SERVICES

*Utilize a professional services team for the support and expertise you need.*

### SIGNIFICANT COST SAVINGS

*Avoid additional overhead and enjoy lower total cost of ownership.*

***Gain speed and scalability at a potentially lower cost—you choose the service that's right for you.***

#### **AD Assisted Installation**

— provides expert help with the installation of AccessData applications into your private, public or hybrid cloud.

#### **AD Managed Service**

— provides installation of your AccessData applications in your preferred cloud environment, with ongoing management of your software in conjunction with your IT team.

#### **AD Isolated SaaS**

— provides installation, configuration, and ongoing management of your software and underlying system in an isolated cloud environment.
