

AccessData has pioneered truly integrated solutions to streamline the investigative and legal process powered by one forensically secure unified database.

From the digital investigator to the largest processing & analysis labs worldwide, AccessData has the right digital forensics solutions for the challenge.

Built on a battle-tested FTK processing core, legal review and regulatory compliance solutions ensure the organization is not exposed to unnecessary risk.

FTK DIGITAL INVESTIGATIONS

An award winning court-preferred digital forensics analysis software. Designed for speed, it's the only solution that combines all data into a single case database.

AD Lab LARGE SCALE INVESTIGATIONS & PROCESSING

A centralized investigative platform that enables division of labor, collaborative analysis, centralized case management and web-based review, streamlining the investigative process.

AD Enterprise NETWORK INVESTIGATION & INCIDENT RESPONSE

Delivers network-wide investigative reach, allowing corporations or government agencies to enforce policies, help protect their data and intellectual property, and reduce costs.

AD eDiscovery COLLECT, AUDIT & ANALYZE

The only true end-to-end platform that helps users increase the speed at which they can collect and review data and insights, which greatly eases compliance efforts, reduces cost and risk of data corruption.

Summation REDESIGNED LEGAL REVIEW

The only web-based solution that offers legal teams a single platform for managing legal hold, data processing, early case assessment, case management, transcript management and complete legal review. This eliminates the risk associated with moving data, while reducing cost and improving collaboration.
