

# AccessData® Forensics Services

AccessData's computer forensics experts are available to assist with your most complex and sensitive investigative or litigation matters involving electronic evidence or data preservation. Our investigators have more than 30 years of experience investigating administrative cases, civil cases, local and federal crimes. We offer personalized services to our clients during every phase of the investigation to ensure that they receive the artifacts and evidence needed for their cases.

## We are available to assist at any stage of your investigation, including:

### IDENTIFICATION

Our team can assist with the identification of devices to be examined and analyzed in your investigation. These devices may include local systems, laptops, servers, network storage, cloud storage, external storage devices, cellular telephones, tablets or any other digital media devices.

### PRESERVATION

Our team can assist in proper handling of both live and dead systems to ensure that valuable evidence isn't lost during the investigative process. Volatile memory capture has become an important aspect of modern investigations and our team can ensure that these critical artifacts are properly collected and preserved.

### DATA COLLECTION

Our team deploys forensically sound methodologies to collect your data for electronic investigation and forensic analysis. Our experts utilize the most advanced techniques and software to ensure that your data will be admissible in court. These processes include obtaining physical or logical images of your target systems and hash values to verify their validity.

### DATA ANALYSIS

Our examiners will conduct an in-depth analysis of your evidence based upon your investigative needs. The examination may include keyword searches, log file analysis, registry analysis, email analysis, timeline analysis or any other analysis based upon the individual needs of your case. Our examiners will work hand-in-hand with you during the analytical stage of the investigation to ensure that all of your investigative needs are met.

### REPORTING AND EXPERT TESTIMONY

Our team will create a customized report that details every step of the investigation and provide all of the relevant artifacts discovered during the examination. Our experts have the experience and credentials necessary to serve as witnesses in both civil and criminal litigations and trials.

### Some of the services offered by AccessData's experts include:

Evidence acquisition and imaging

Hard drive data recovery

Email, text message and instant messaging analysis

Expert analysis of Windows®, Mac® and Linux® systems

Keyword and index searching

Expert analysis of cellular telephones and mobile devices
