

DEMYSTIFY YOUR DIGITAL INVESTIGATIONS

AND GET TO THE REAL STORY BEHIND THE DATA

With today's incredible data deluge and the countless regulations governing its collection, preservation and management, law enforcement, corporate and legal professionals alike demand intuitive, future-forward tools that empower data collection and analysis excellence.

AccessData—Our name is our purpose and our promise.

We can't make it any clearer than that. We make data accessible for most any digital investigation or e-discovery application. All kinds of data, across any device, system or global network.

We've been doing it for more than 30 years

And we've gotten very good at it. Forensic labs, corporations and law firms all over the world count on us for the scalable, state-of-the-art and legally defensible solutions that help them:

- Conduct **no-stone-turned digital forensic investigations**—criminal, civil and corporate.
- Expertly and cost-effectively **manage even the most massive data collection, processing, analysis and document review** projects during e-discovery or internal audits.
- Be prepared and proactive as you **conduct exhaustive post-breach analyses** or take preemptive actions to identify violations and potential employee misconduct.
- **Manage compliance** in the face of ever-changing and increasingly treacherous data collection, management and preservation regulations.

Setting today's industry standard...

We're the digital data experts and innovators behind **Forensic Toolkit®**, the gold standard for digital investigations. Unmatched in the industry for processing speed, stability and ease of use, our FTK® processing technology provides the engine for many other forensic and e-discovery solutions.

Pushing tomorrow's possibilities...

As relevant data sets continue to grow in size, diversity and complexity, we're leveraging leading-edge technology across our portfolio. In fact, **Quin-C**, our groundbreaking new forensics platform, is helping customers uncover critical evidence faster, make more meaningful connections across data and build better cases. And it's only the beginning.

How can we help?

Your processing and analysis needs are varied and unique. Below you'll find just a few ways AccessData can help you succeed.

FORENSIC INVESTIGATIONS

Need to identify and collect electronic evidence from any digital device or system?

Our court-proven, forensics flagship product, **Forensic Toolkit** helps you zero in on evidence faster than ever. Search, filter and index across varied and far-flung media or devices quickly and easily. All digital evidence is stored in a centralized, secure case database—easily accessible to your entire team.

Need to power through seemingly impossible data sets? Consider **AD Lab**. With distributed processing capabilities and powerful web-based review functionality, AD Lab offers the fastest processing speed in the industry as well as almost limitless scalability.

COLLECTION & ANALYSIS

Want to conduct a large-scale search or audit of broad range data? Looking for reliable, defensible data collection that will hold up in court?

The fast, timely and legally defensible collection of evidence is the critical first step in any investigation or case.

AD eDiscovery[®] offers a single, fully integrated, forensically sound platform for enterprise-wide preservation, collection, search, processing, data assessment and complete legal review. All this from a single end-to-end solution means less cost and wasted resources for your organization. And our latest enhancements mean you can collect data faster from even more data sources.

E-DISCOVERY & DOCUMENT REVIEW

Looking for a more reliable, flexible e-discovery platform? One that takes the hassle of dealing with systems, software and hardware out of your hair—and into the cloud?

With cloud-based e-discovery tools powered by **FTK** and **Quin-C**, your litigation teams can enjoy secure, anywhere, anytime access to scalable e-discovery tools that flex to the needs of your workflow—data processing through document review. All without the headache or expense of building out your systems and infrastructure. Quin-C in the cloud offerings mean you pay only for what you need. Leave the setup, management and maintenance to us.

DATA SECURITY & POST-BREACH READINESS

Will you be prepared and protected if your data is compromised?

Data breaches, employee compliance transgressions, even IP theft and other misconduct are all too common. The risks and consequences too costly. You want to be sure your organization has a powerful, agile solution in place.

For massive employee pools working remotely or across multiple offices, **AD Enterprise** provides deep visibility into live data directly at the endpoint to help you stop risk cold. Find and eliminate offending files, rogue processes and noncompliant activities. Conduct faster, more targeted enterprise-wide post-breach analysis as well as HR, compliance or other internal investigations.

Whether it's for investigation, litigation or compliance, AccessData[®] offers industry-leading solutions that put the power of forensics in your hands. For over 30 years, AccessData has worked with more than 130,000 clients in law enforcement, government agencies, corporations and law firms around the world to understand and focus on their unique collection-to-analysis needs. The result? Products that empower faster results, better insights, and more connectivity. For more information, visit www.accessdata.com
