

QBlaze from AccessData®

Blazing fast, desktop legal review with the power of SaaS

Get a fully managed, lightweight software client that leverages the AWS cloud

In the heat of legal review, you want to gain speed and capacity without burning through resources. AD QBlaze™ from AccessData provides a blazing-fast, flexible desktop review experience delivered in a unique SaaS (software-as-a-service) model, fully managed by AccessData and built with the power of Amazon EC2 (AWS Amazon Elastic Compute Cloud) and Amazon RDS (AWS Amazon Relational Database Service).

With QBlaze, you get the performance of a desktop app and a rapidly autoscaling database and engine with Elastic Cloud Processing—with little to no IT management required or burden to infrastructure—for unmatched efficiency, consistent peak performance and deep cost savings.

Scale and speed your investigations and discovery

QBlaze lightens the load on admins and reviewers so they can maximize review time and output, delivering:

- Wizard-driven upload/export, predefined processing, and intuitive review in a simplified interface that can be mastered in minutes
- A robust tool set capable of handling any standard review, including document navigation, labeling, metadata filtering, keyword search, geolocation, tagging, image recognition, mobile data review and more
- Easy start up, one-click software updates, and a fully managed, cloud-hosted DPE and database

And QBlaze lets you expand capacity automatically without straining IT resources, by leveraging a groundbreaking SaaS platform that ensures scalability, security and reliability.

Simplified tasks, powerful tools for strong core legal review

Add, Process and Export Evidence in a Few Clicks

With the QBlaze wizard-driven workflow, simply input a case name, point to the evidence, check predefined processing settings, and click to begin. QBlaze automatically creates the case inside the AccessData unified database, gives a summary of your tasks, uploads the data to the cloud, kicks off processing, and adds the evidence to your case.

After processing and review, QBlaze guides you through a minimal-option interface to create, export and download your dataset.

Get Automatic, Elastic Processing and Storage Capacity

QBlaze runs elastic cloud processing (autoscaling DPE) supported in the cloud by AWS, letting you burn through data at top speed and have the engine expand as needed. It also leverages AWS for autoscaling the database, so you can throw as much data at a case as you need, with minimal cost and burden per transaction.

View Large Files and Multimedia Fast, with Clarity Unlike with web-based review, large documents and multimedia files won't lag on QBlaze. View a PDF with tens of thousands of pages in seconds or watch a gigabyte movie or multimedia file without waiting to download or stream data.

Empower Any Reviewer or Investigator

Even the greenest or most nontechnical investigator can be up and reviewing with minimal training—saving significant time and maximizing the output of your entire team.

Customize and Automate with the API

Advanced users may want to customize and automate their workflow, leveraging the platform's API. Integrate any tool, including third-party case management software. Easy enough for DIY or with expert support available from the AccessData Services team.

QBlaze lets you locate your files quickly by size, category or extension. An optimized thumbnail workflow speeds you through image investigations.

The fully functional grid view enables basic filtering and sorting so you can understand the critical metadata associated with each document. A dynamic display organizes commonly selected filters; integrated graphics help you visualize your data.

Image recognition allows you to identify a wide range of images including weapons, drugs, nudity, currency and more. Machine learning trains the system to find objects within images, so you can quickly select only the models and images on which you wish to run categorization.

Whether it's for investigation, litigation or compliance, AccessData® offers industry-leading solutions that put the power of forensics in your hands. For over 30 years, AccessData has worked with more than 130,000 clients in law enforcement, government agencies, corporations and law firms around the world to understand and focus on their unique collection-to-analysis needs. The result? Products that empower faster results, better insights, and more connectivity. For more information, visit www.accessdata.com
