

## YOUR PROFESSIONAL SERVICES PARTNER

### Comprehensive and customizable services for forensic investigations, litigation support, and breach avoidance/response planning

Managing the essential data, tools and technology during digital investigation and incident response or an e-discovery project can be an incredible drain on time and resources. For more than a decade, our expert professional services team has been helping organizations like yours with exceptional service and support.

From cloud-based data acquisition, investigations and preservation plans to e-discovery processing or even in-depth workflow/policy analysis consultations, AccessData Professional Services can help your team with any strategic or tactical forensic, audit or e-discovery need—efficiently and cost-effectively.

#### Sometimes you need a little help. Sometimes you need more.

Heavy project load have your internal teams stretched thin? Or are you looking for a more robust, fully managed solution? At AccessData, we are your go-to resource for digital investigation and incident response or full EDRM support, cloud migrations, data hosting and application sizing.

**We can help your team work smarter and more effectively** by providing a wide range of professional and consultative services, including:

- Hardware provisioning
- Forensic imaging
- Data mapping
- Disaster recovery services
- Post-breach incident response planning
- Training and documentation
- Data collection and preservation
- Digital investigation and incident response
- Document review or production
- Fully managed litigation/EDRM support
- Comprehensive workflow analysis
- Business process consulting
- Cloud provisioning

#### Meet your Professional Services partners

Our Professional Services experts have been where you are. They come from a wide range of law enforcement, litigation management, corporate security, federal agency, IT and law firm backgrounds. Along with deep industry knowledge, they are certified experts with proven track records in the planning, execution and reporting of digital investigation, incident response and e-discovery projects.

Whether you're looking for fully managed services or case-by-case project work, our Professional Services team has the expertise and experience to deliver the exceptional support you and your clients or stakeholders demand.

# Comprehensive investigative or e-discovery workflow support

Beyond ensuring your AccessData® products are implemented and working as they should, we take the time to listen and understand. Our professional services team will expertly and efficiently manage any forensic investigation or e-discovery projects. A true partner and extension of your team, we've always got your back.

## DIGITAL FORENSICS SERVICES

Our professional services team offers a full spectrum of forensically sound solutions to help clients preserve, collect and analyze data from laptops, desktops and mobile devices. Employing proven methodologies and cutting-edge AccessData tools (like the groundbreaking Quin-C, which leverages smart analytics to help find and connect more relevant data faster than ever before), we deliver expertly managed solutions that are efficient, affordable and legally defensible.

## E-DISCOVERY SERVICES

From ESI identification, collection and ESI processing, through review and production, our professional services span the full scope of the EDRM and can be customized to your litigation support needs.

## PRE-PLANNING AND POST DATA BREACH SERVICES

It may no longer be a matter of "if," but "when" an organization will be breached. Our data experts will work with your team on defensible and compliant data avoidance and post-breach strategies to mitigate risk and minimize potential damages. From system protections to rapid response plans, our professional service teams can help:

- Identify breach threats and common system vulnerabilities
- Implement data security safeguards
- Conduct exhaustive data mapping
- Perform endpoint scans and ongoing network monitoring
- Develop and document an incident response plan

## Your Cloud or Ours? AWS™ or Azure®?

AccessData Professional Services provides comprehensive cloud support. Our expert team can help you evaluate the best options based on your needs: private cloud, on-premise or hybrid cloud solutions. Or, if it makes sense, we can host your data and essential tools.

We're also with you every step of the way. We can help put your cloud in order by offering full migration and implementation services—not just tools from our AccessData portfolio, but all your critical data, systems and tools. Let us weather the challenges of cloud migration for you.

## How can we help?
